**Mark Your Calendar for the 2008 Dynamics SL User Group**

This year's Dynamics SL User Group is coming up September 17-19, 2008. The Dynamics Users Group SL is a community of organizations who are using Microsoft Dynamics SL software. This group provides a means of helping Dynamics SL users meet, network and learn from each other how to take full advantage of their software investments. The group also provides a forum for business to interact with others using the same software and direct support from Microsoft.

The meeting will provide your

company with the ability to share news, ideas and developments, helping to create a better platform.

The 2008 meeting will be held in Hartford, Connecticut. Corporate membership is \$500 and includes tuition for up to 2 attendees. Additional attendees are \$250 per person. Corporate rooms are also available at the Hartford Hilton Hotel, [www.hilton.com](http://www.hilton.com) for \$159 a night with convention code DNG.

Don't miss this exciting networking opportunity to learn more

about your Microsoft Dynamics SL system. To join visit, [www.dynamicsusersgroup.com](http://www.dynamicsusersgroup.com) and get details on the benefits to your organization. Several Cardamel representatives will be present and we look forward to seeing you there.

**Tips and Tricks: Five More Reasons to Upgrade to Microsoft Dynamics 7.0**

1. **Extend Access to Information—Business Portal Project Access**—Create, edit or view project information from the web, using the new Project Maintenance screen. The Business Portal project maintenance screen is a combination of information pulled from five separate screens to provide project users the information they need at their fingertips. Access to project data is restricted by role and can also include which fields can be viewed, edited or what default values should be set.
2. **Business Portal based on Windows SharePoint Services 3.0**—The new Business Portal builds on top of Windows SharePoint Services to provide access to your enterprise resource planning (ERP) data along with providing access to SharePoint features such as document repository, calendars, blogs, wikis and really simple syndication (RSS) feeds.
3. **Maintain Security and Efficiency**—New optional security features supports Windows Authentication so users can log into their systems and Microsoft Dynamics SL without the need to re-enter information. This also makes Microsoft Dynamics SL compliant with your corporate password policies.
4. **Continued Compatibility with the Latest Technology**—Microsoft Dynamics SL 7.0 provides support for the latest technology so you can continue to grow your business using the latest business tools. Included are support for the Windows Vista operating system, Microsoft SQL 2005, and Windows SharePoint Services 3.0, Microsoft Office SharePoint Server, Microsoft Office 2007 and Microsoft Project 2007.
5. **Screens and Interface Upgrade to Visual Basic 2005-.NET Product**—Microsoft Dynamics SL 7.0 has been rewritten to run in Microsoft Visual Basic 2005, making it a .NET product. This allows companies to use the latest tools to customize the experience for their industry needs for custom development and provides the product a great base for developing future features and interfaces

### **September Financial Webinar AP**

Log-in for our September Financial Services Webinar Series Monday September 15, 2008. Perfect for training new employees, this month's focus is Accounts Payable and will cover the accounting cycle and the processes required to enter vendor invoices and process checks. Learn how to make adjustments, prepayments, month-end closing, control cash flow and more through this quick educational webinar.

To register go to [www.clicktoattend.com](http://www.clicktoattend.com) Event Code: 130708

## **User Group: Outsourcing Your IT Department with Managed Services**

September 24, 2008 we will be hosting a special User Group to showcase Managed Services. Join Dell representatives and Cardamel consultant, Dominic LaGiglia, to learn about how utilizing enterprise resources through a managed services plan can benefit your company.

With constant threats from unscrupulous viral hackers, you may find your IT department is constantly putting out fires rather than working on business development that can help your company grow consequently costing you money. With Cardamel monitoring your system 24/7 you can remediate any problems and with less down-time, your staff can be more productive with your IT department focusing on more important issues. Automatic license management and patch-management will ensure that your computer system is up-to-date.

Discover more about how this exciting, new service can benefit you and speak to Dell about how a leasing approach to hardware purchasing can save you even more money. This event will be from 10 a.m. to 1 p.m. and includes lunch. It will be at the Microsoft Offices at 7595 Technology Way, Suite 400. To register go to [www.clicktoattend.com](http://www.clicktoattend.com) Event Code: 130657. If you are unable to attend, register to attend remotely at [www.clicktoattend.com](http://www.clicktoattend.com) Event Code: 130710.

### **Denver Microsoft Dynamics Customer Event Session**

In these challenging times, maximize the value of your Microsoft Dynamics investment. Attend the Microsoft Dynamics Customer Event Tuesday, October 16, 2008 from 9 a.m. to 2:30 p.m. and immediately gain additional value from your Dynamics investment. Learn how to leverage and expand your Dynamics solution to increase processes, visibility and profitability. Microsoft product specialists will demonstrate how your Microsoft Dynamics solution can enable your people to propel your business forward through best practices and breakout sessions to focus on key business processes.

This is a great place to connect with your peers and share best practices. You will have the ability to network with other business leaders in your area and discuss current trends in your industry.

Seating is limited. Register now to join Microsoft business solution advisors, who will share insights, demonstrations and roadmaps for Microsoft Dynamics, as well as the extensive integration with other Microsoft products.

This Customer Event will be held at the Microsoft Offices at 7595 Technology Way Suite 400 in Denver. To register go to: <https://msevents.microsoft.com/CUI/EventDetail.aspx?EventID=1032385230&culture=en-US>.
